# LH Flow meters

## Flow meter features

### Features & Benefits

Accurate, durable, low maintenance

- ensuring years of trouble free operation

Five different sizes and a large range of inline connectors available

- allowing a flow meter and fittings to be found for most requirements

BBA approved for use in conjunction with LH Agro monitors and controllers

- confirming accuracy through the toughest tests in Europe

All materials are resistant to all known agricultural herbicides, pesticides and fungicides

- making these flow meters fit into a wide range of applications

### Connectors

Each of the five flow meters have a large measuring range:

- Type 10D = 1.5 - 85 L/min. (0.40 - 22.5 US g/min.)
- Type 16D = 5 - 160 L/min. (1.32 - 42.3 US g/min.)
- Type 20D = 20 - 250 L/min. (5.28 - 66.0 US g/min.)
- Type 26D = 20 - 400 L/min. (5.28 - 106 US g/min.)
- Type 40D = 40 - 1000 L/min. (10.6 - 264 US g/min.)

A large range of hose & threaded connectors are available for each size of flow meter. Connectors compatible with the TeeJet® 50-series flanges are also available.

### Ordering information

Some examples of the large range of different flow meters & connectors follow:

906-987 Type 10D excl. connectors

907-986 Type 16D excl. connectors

906-986 Type 20D excl. connectors

908-986 Type 26D excl. connectors

909-986 Type 40D excl. connectors

941-991 Type 16D - 50 Series flange

933-988 Type 20D - 50 Series flange

934-002 Type 26D - 50 Series flange

Complete connector kits are also available, please contact your dealer for more information.
