

SENTRY 6510 GRAIN LOSS MONITOR

The Sentry 6510 Capacity monitor offers an easy-to-use system indicating grain loss from sieves and straw walkers on two indicators. Combined with the current ground speed in the equation, this provides a combine capacity indicator. Reduces grain loss and drying costs. Can be fitted to almost all combines, new or used.

SENTRY 6510 GRAIN LOSS MONITOR

PART NO.	DESCRIPTION	ORIGIN	EURO
KITS			
990-630-EN	Kit, Sentry 6510- Capacity Monitor, with Grain Loss Sensors	AAB	€ 1.780,14
